### Notes & definitions

- Source: the raw GA4 BigQuery event export for mybrainguide.org, available from **May 17, 2026** onward.
- **Category** is a lightweight grouping derived from the event name (clicks, forms, media, etc.) to make the inventory easier to scan — it is not a native GA4 field.
- For engagement specifically on brain health **result pages** (Save PDF, Email Results, etc.), see [Result Pages](#).
