Notes & definitions

- **AD8 score** — total "Yes" answers across the 8 questions (0–8). Score 0 = no changes noticed; score 8 = changes noticed in all areas.
- **Good (0–1)** — unlikely significant cognitive impairment. **Poor (2–8)** — possible cognitive impairment; follow-up recommended. **High Concern (5–8)** — elevated

concern.

- **Respondent vs. subject** — demographics (gender, age, education, race) describe the **caregiver or family member** filling out the form, not the person they are concerned about.
- **"Not Sure" answers** = 0 points, same as "No." Respondents who are unsure may underestimate or overestimate concern.
- **Personas** — all AD8 routes lead to "guide-loved-ones" pages, i.e. the four **Someone Else** personas (`other-undx-poor`, `other-dx-poor`, `other-undx-good`, `other-dx-good`), because this is a Someone Else / caregiver flow.
