Monthly Actions by Type

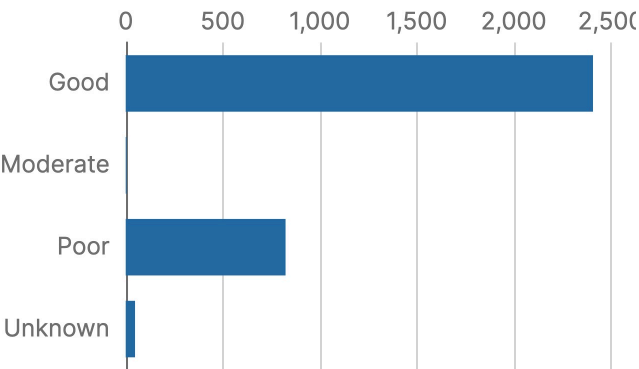

By Brain Health Indicator

Every result page indicates a brain health outcome for the visitor — **Good**, **Moderate**, or **Poor**. Assessment-based personas resolve to Good or Poor; Speech Based Cognition (SBC) pages map Low / Medium / High Risk to Good / Moderate / Poor. See the [Scoring Reference](#) for the full mapping. Pages with no persona mapping appear as **Unknown**.

Notes & definitions

- **Result page (Persona)** — a persona/outcome page a visitor lands on after completing (or engaging with) a brain health questionnaire. Personas are labelled by their three routing axes — Audience · Diagnosed · Brain Health (e.g. *Self · Not Diagnosed · Poor*) — per the `persona_page_map` seed. Full mapping on the [Scoring Reference](#).
- **Audience** — whether the persona page is for the visitor themselves (**Self**) or a loved one (**Someone Else**), a fixed attribute of the page.
- **Diagnosed** — whether the persona reflects an existing diagnosis (**Diagnosed / Not Diagnosed**); SBC pages route by risk level, not diagnosis, so they show **N/A**.
- **Brain Health** — the outcome the page indicates (**Good / Moderate / Poor**), a fixed attribute of each page defined in the `persona_page_map` seed. Assessment-based personas resolve to Good or Poor (the four `*-good` personas → Good; the four `*-poor` personas → Poor); Speech Based Cognition (SBC) pages map Low / Medium

/ High Risk to Good / Moderate / Poor. Full mapping on the [Scoring Reference](#). Unmapped pages show as **Unknown**.

- **Actions** — on-page events such as Save PDF, Email Results, Audio Play/Pause, and Locate a Healthcare Provider.
- **Language** — English and Spanish locales of the same page are tracked separately here (English and Spanish slugs share an `en_slug` upstream if you need to roll them together).
- Coverage: **Nov 2024 → present**. The historical portion (through May 17 2026) comes from the GA4 Data API and lacks session-level dedup; from May 18 2026 onward data is from the raw GA4 BigQuery export (its first persona/tailored-events date).
